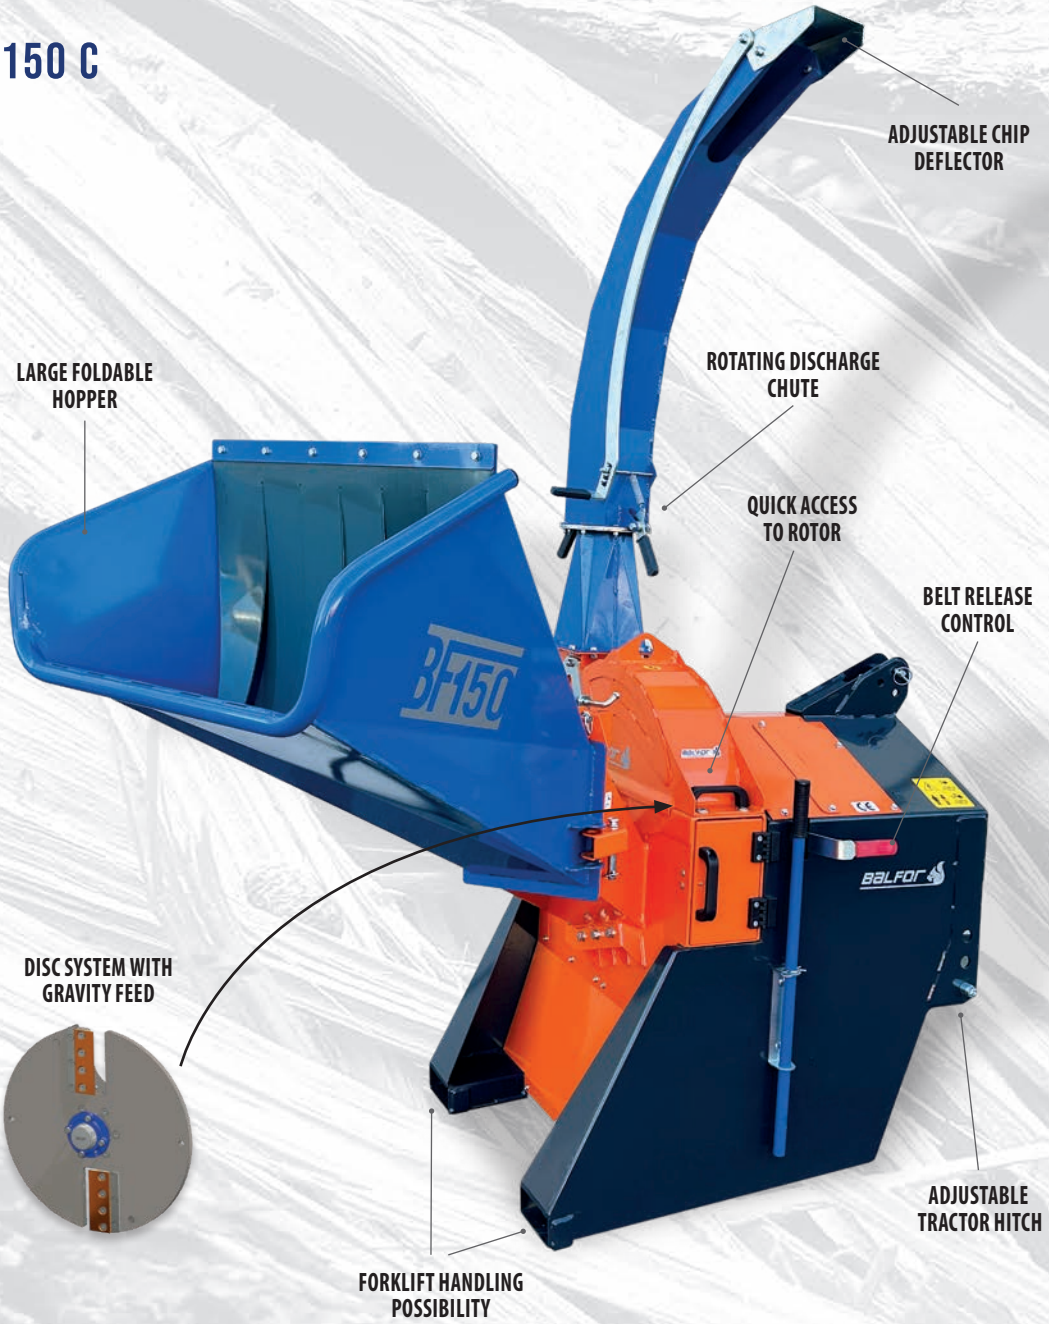
# BF 150 C



The **BF 150** is a machine capable of shredding green wood branches up to 15 cm in diameter. The branches advance by gravity and because they are pulled in by the knives themselves. The BF 150 chipper operates with a transverse rotor with a disc system with 2 knives. It is the ideal machine for shredding branches, prunings and logs even of medium or large dimensions. The discharge chute rotates 270° and is adjustable thanks to practical handles located on the chute. The hopper is foldable for transport and measures 76 cm x 50 cm.

The **BF 150** is entirely built in high-quality steel to guarantee maximum durability over time and optimal resistance to stress.
