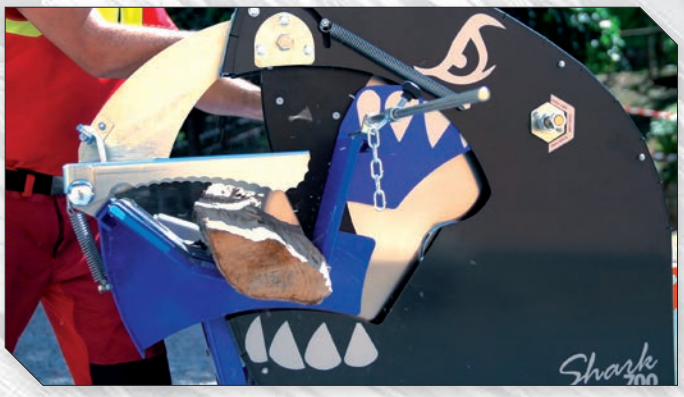
SHARK 700 C

DI 600 EM

SHARK 700 EM



SHARK saws are the result of careful study and decades of experience in the manufacture of professional saws. SHARK is in fact the only saw that allows cutting logs over 30 cm in diameter and the only one capable of guaranteeing good visibility during operation. Shark allows safe work without obstructing the view of the cutting operations.

All other circular saws have a metal plate that covers the log and the blade, preventing visibility for the operator. Chainsaw holder, adjustable rear blade guides, WIDIA blade, 3-belt transmission (not available in 220V), dust extractor preparation, emergency brake, double log-locking handle mounted on bearings are just some of the features that make SHARK a superior-level product. **SHARK**, like all Balfor products, complies with the most recent safety regulations in force.

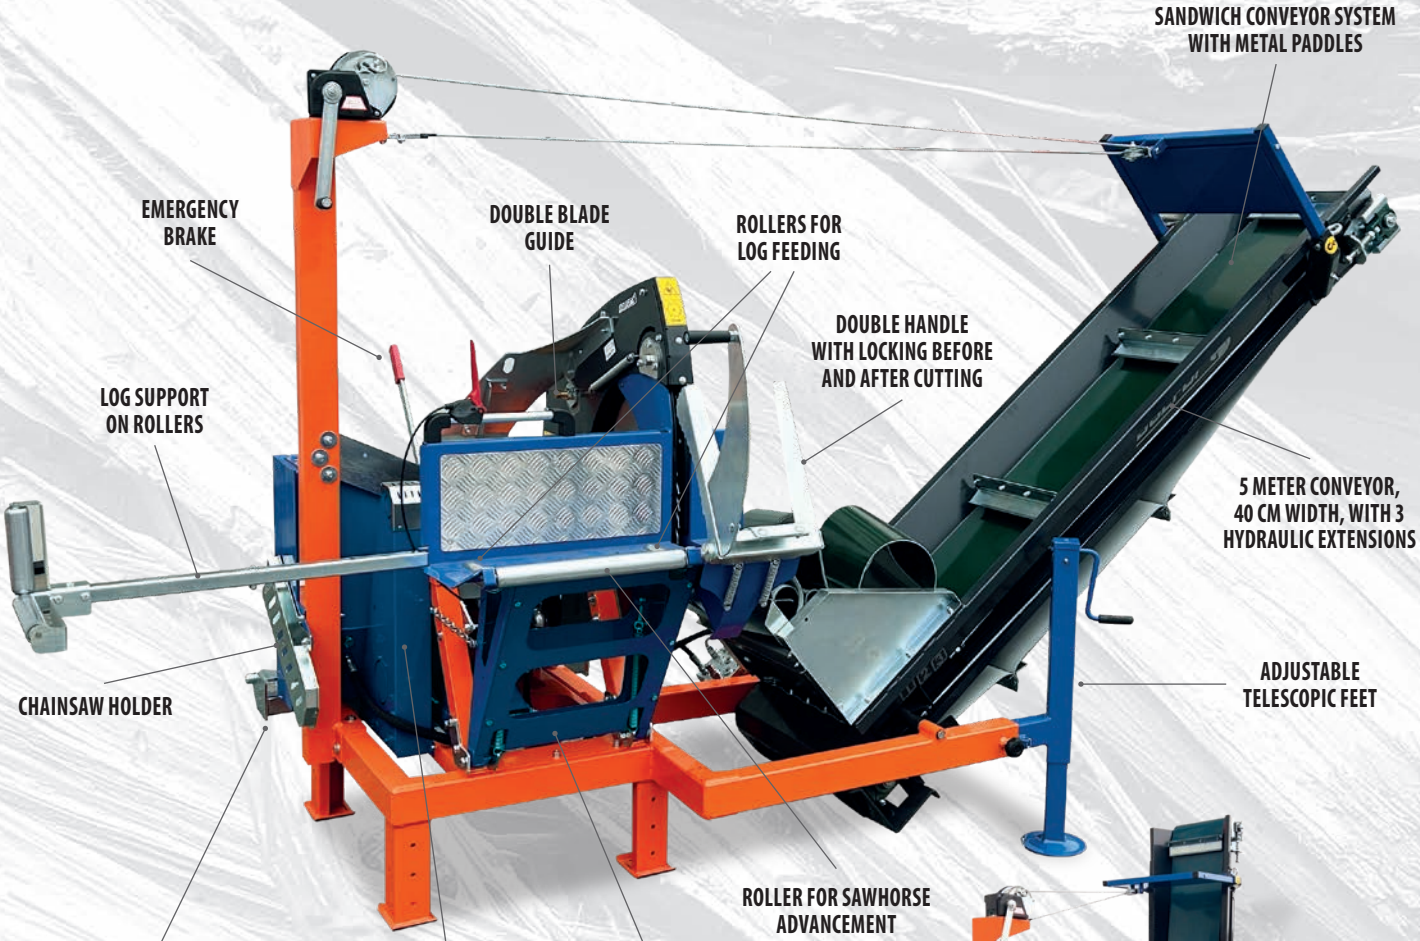
SHARK 700 EXPERT



SHARK 700 EXPERT PRO

SHARK EXPERT is the combination of the SHARK saw with a 40 cm wide conveyor belt with three hydraulic extensions. Thanks to the three extensions, SHARK EXPERT can benefit from a 5-meter conveyor that, once closed, is truly compact. Thanks to the 40 cm width between the sides, it offers very high evacuation capacity. The belt extension is hydraulic, all paddles are made of metal and the reinforced PVC sections are interchangeable.

SHARK 700 Expert Pro completes the Shark 700 Expert by adding a side log splitter with hydraulic wedge. The log splitter supplied with the Pro version is 16 tons and the hydraulic wedges included are 2/4-way and 6-way. In both cases, the splitting length is 55 cm. During transport, the log splitter can be folded to remain within the machine's overall dimensions.
