BALFOR®

WARRANTY 5 YEARS

▸ A 10 VARIO

▸ A7 VARIO

▸ A12 VARIO

VARIO log splitters are small in size but very effective and powerful. Thanks to the possibility of working in several positions, they guarantee maximum convenience in every situation. The double speed and double pump (the latter for the 12 ton models) guarantee a high hourly output. The new inclined wedge system allows 30% better penetration into the wood, making it possible to work even on particularly hard and knotty logs. The non-slip aluminium inserts fixed to the base of the log splitter allow you to work precisely without having to reposition the log when splitting.

The **VARIO** models are easily movable and, thanks to the possibility of working horizontally as well, allow the operator a comfortable working position at all times.
